

CERTIFIED PEDIGREED SWINE

"Depend on Us"

Certified Pedigreed Swine (CPS) has various functions in the purebred swine industry. The most important one of these is to service the needs of Chester White, Poland China and Spotted swine producers across the country. In an effort to efficiently process pedigrees and transfers, conduct national shows, maintain performance programs, and to work daily with purebred, commercial producers and 4-H & FFA youth across the country, we have a professional staff of individuals that take their job very seriously.

We invite you to become part of an exciting opportunity with purebred producers across the country that are serious about improving the genetic pool available in the industry. Whether you're in need of one showpig, a group of twenty boars, or hundreds of gilts, we can assist you in quality, quantity and service. Give us a try.

CHESTER WHITE:

Noted across the country as the easiest keeping, most productive, most consistent female in the industry. Chester Whites possess the extra width, volume, structure and toughness to withstand any environment. Combine this with superior meat quality, disposition and show ring presence, and you have captured the needs of today's ideal hog.

POLAND CHINA:

The modern Poland Chinas of the 21st century will complete the picture of idealism. You'll appreciate the extra length of body, extreme growth, lean muscle mass and vigor that the 2006 Poland China delivers. The Poland breed contains hundreds of breeders nationwide that will prove to you that Poland China hogs are some of the industry's best.

SPOTTED:

The "New Look" Spotted hog has created an extreme amount of interest across the country. Not only are they attractive to look at, they are extremely muscular, sound footed, fast growing and productive in the farrowing house. Showrings across the country are seeing Spotted animals in the winners circle. Try them in 2006 and you'll be convinced they are the "New Look" with the "Model of Excellence."
